

Now Offering Telemedicine *Healthcare Virtually Anywhere*

Telemedicine allows you to visit with your primary care or psychiatric provider using your phone, allowing you to discuss your healthcare concerns from the convenience, comfort and safety of your home.

How Does it Work?

We will schedule a phone appointment just like an in-office visit. By phone, our staff will initiate your appointment by contacting you 30 minutes prior to the scheduled appointment to collect background information. Based on that phone assessment, if the provider feels an in-office assessment necessary, we will help set that up for you. This can all be done from the convenience, safety and comfort of your home.

Benefits of Telemedicine.

Choosing a Telemedicine appointment allows you to:

- Reduce transportation time and costs
- Minimize time needed off of work
- Eliminate child or elder care issues
- Reduce exposure to illness

How Do I Schedule an Appointment?

Patients can call **480-983-0065** to determine if their needs can be best served with a Telemedicine appointment. Our customer service representative will assist you in scheduling an appointment. We are also working towards using video for future appointments. You will be contacted soon by Horizon staff to help you make that an option for your future appointments.

If you are interested in using Telemedicine services, please call 480-983-0065 or visit www.hhwaz.org.
